

First Non-Repeated Character
5 marks

5/5 answered

Your Code

```
1 import java.util.*;
2 import java.util.regex.*;
3 public class Main {
4     static boolean isComposite(int x) {
5         if (x <= 3) return false;
6         for (int i = 2; i * i <= x; i++) {
7             if (x % i == 0) return true;
8         }
9         return false;
10    }
11    public static void main(String[] args) {
12        Scanner sc = new Scanner(System.in);
13        StringBuilder sb = new StringBuilder();
14        while (sc.hasNextLine()) {
15            sb.append(sc.nextLine()).append(" ");
16        }
17        String input = sb.toString().trim();
18        if (input.isEmpty()) return;
19        Matcher m = Pattern.compile("-?\\d+").matcher(input);
20        int count = 0;
21        while (m.find()) {
22            int x = Integer.parseInt(m.group());
23            if (isComposite(x)) count++;
24        }
25        System.out.println("Number of Composite Numbers = " + count);
26    }
27 }
```

Input

0,160,180,270,160,210,190,0

Output

Number of Composite Numbers = 6

Q2 Skip K Numbers

5 marks

Write a program to print the numbers from M to N by skipping K numbers in between.

Sample: M=50 N=100 K=7

Your Code

```
1 import java.util.*;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner sc = new Scanner(System.in);  
5         int M = sc.nextInt();  
6         int N = sc.nextInt();  
7         int K = sc.nextInt();  
8         for (int i=M; i<=N; i=(i+K+1))  
9         {  
10             System.out.print(i + " ");  
11         }  
12     }  
13 }
```

Input

50
100
7

Output

50 58 66 74 82 90 98

Q3 Reverse Alphabetical Order

5 marks

Write a program to arrange the letters of the word alphabetically in reverse order.

Sample:MOSQUE->U S Q O M E

Your Code

```
1 import java.util.*;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         String s = sc.nextLine();
6         char[] arr = s.toCharArray();
7         Arrays.sort(arr);
8         for (int i=arr.length-1;i>=0;i--)
9             {
10                 System.out.print(arr[i]+(i==0? " " : " "));
11             }
12     }
13 }
```

Input

MOSQUE

Output

U S Q O M E

5/5 answered

Write a program using a choice to check string/number palindrome.

Your Code

```
1 import java.util.Scanner;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner sc = new Scanner(System.in);  
5         String input = sc.next();  
6         boolean isNumber = true;  
7         for (int i = 0; i < input.length(); i++) {  
8             if (!Character.isDigit(input.charAt(i))) {  
9                 isNumber = false;  
10                break;  
11            }  
12        }  
13        String rev = "";  
14        for (int i = input.length() - 1; i >= 0; i--) {  
15            rev += input.charAt(i);  
16        }  
17        if (input.equalsIgnoreCase(rev))  
18            System.out.println("Palindrome");  
19        else  
20            System.out.println("Not Palindrome");  
21    }  
22 }
```

5/5 answered

Find the first non-repeated character in a string.

Sample:SWISS->W

Your Code

```
1 import java.util.*;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner sc = new Scanner(System.in);  
5         String s = sc.nextLine();  
6         int[] freq = new int[256];  
7         for (int i = 0; i < s.length(); i++) {  
8             freq[s.charAt(i)]++;  
9         }  
10        char ans = '\\0';  
11        for (int i = 0; i < s.length(); i++) {  
12            char c = s.charAt(i);  
13            if (freq[c] == 1) {  
14                ans = c;  
15                break;  
16            }  
17        }  
18        if (ans != '\\0') System.out.print(ans);  
19        else System.out.print("-1");  
20    }  
21 }
```
